Best Global Universities for Optics

The study of optics deals with the genesis and propagation of light, the changes that it undergoes and produces, and other phenomena closely associated with it. This category covers topics such as lasers and laser technology, infrared physics and technology, microwave technology, quantum optics, lightwave technology, fiber optics, opto-electronics, and photonics, as well as photometry and luminescence. These are the world's top universities for optics, based on their research performance in the field. Read the methodology »
